

# GOING TO BED was my worst moment

Night time for Sitawa Sifuna was an unpleasant moment of the day.

"I lived a life that had no peace especially from within. Whenever I would go to sleep, I had bad dreams. I used to dream of being attacked with knives, sometimes spiritual husbands sleeping with me and other times falling from the cliff. This situation made me be afraid of the night.

It reached a time where things got worse to the point of waking up in the morning and find my body with many cuts without any blood stains on the beddings. While busy working during the day, I would have cold feeling on my hand and when I checked, I had a cut and no blood came out at all. There were days when I would see shadows coming from bedroom and I would cry alot because I didn't know what was happening with me. I thought maybe I was cursed.

When I received an invitation to the Universal Church, I was introduced to

the Chain of Prayers especially on Friday. I was taught how to overcome the situation through my faith. I committed myself to prayers because I knew how much I needed deliverance.

At first, it was not easy because I remember when I started the Chain of Prayer, the situation became worse. I started having cuts on my body almost every night, but I never gave up fighting until God set me free completely. Today, I don't have sleepless nights at all, I have peace inside me and also am a servant of God." Says Sitawa Sifuna.
